EXPERIENCE **Senior iOS Engineer**

Nike | 2017 - Present

- Developed marquee features for the Nike App, including Favorites, UGC on Product Details, and geo expansion
- Collaborated with cross-functional teams to ensure timely delivery to meet timelines
- Shipped our second AR experience while screening and collaborating with multiple vendors to produce high-quality assets
- Operated as a flex resource in helping bring Nike Fit and Shop This Look to completion
- Worked with engineering leadership to balance product needs with engineering priorities to limit technical debt
- Mentored a group of interns and sat on various panels for interns and college candidates

iOS Engineer

Nike | 2014 - 2017

- Worked on the launch of Nike's key ecommerce app, SNKRS, from inception to delivery as an intern and later FTE
- Helped pivot the engineering org to use Swift instead of Obj-C
- Assisted with Nike's migration of web services from data center to the cloud, including working with backend teams to decide on API contracts, SLAs, and architecture
- Standardized the implementation of analytics across SNKRS on Android, iOS, and web; worked closely with third-party vendors to vet proof of concepts
